

Filter Press Cloths for Sand Washing Systems

Septek Filter's **SiltKing™** line of filter press cloths are purpose-built for sand washing applications, delivering exceptional durability and long-lasting performance. Designed to withstand the abrasive effects of sand and gravel, our filter cloths provide effective filtration with excellent cake release properties. Additionally, we offer backing cloths to support our filter cloths in the filtration process, ensuring optimal performance and longevity of the filter press system.

Our **SiltKing™** product line has assisted our customers in achieving the following benefits:

- Reduced cloth damages
- Optimal cake release due to weave structure and fibre properties
- Excellent resistance to abrasive slurries, owing to superior fibre properties
- Reduced fabric blinding, thanks to the special weave structure
- Decreased cake moisture levels.
